HOW A COMPUTING LESSON SHOULD LOOK…

AfL takes place throughout the lesson.

(1) Share mantra/context for the lesson.

(2) Revisit and retrieve to build automaticity.

(3) Share LO and key vocabulary.

(4) Teach/model whilst using subject specific language.

(5) Practise/apply the skill.

(6) Reflect and evaluate. (This may be a plenary or mini-plenary).

All elements taught using this pathway are components. They will build up together to create composites such as a complete PowerPoint Presentation or a program/application.
